Northern Excellence in Active and Healthy Ageing Symposium

Tuesday 6th June 2017, Horizon Leeds

Symposium Agenda

Registration	08:45 – 09:30
Welcome Address, Richard Stubbs	09:30 – 09:45
Keynote 1, Professor Maddalena Illario	09:45 – 10:15
Keynote 2, Professor Martin Vernon	10:15 – 10:45
Northern AHA Exemplar Practice – Yorkshire and Humber	10:45 – 11:00
Coffee Break	11:00 – 11:15
Northern AHA Exemplar Practice – North East	11:15 – 11:30
‘Raising the Bar’ Lessons from Wales, Scotland and Northern Ireland	11:30 – 11:50
Domestic, European and Global Partnership Working	11:50 – 12:10
Morning Speakers’ Panel Q&A	12:10 – 12:30
Lunch and Group Photo	12:30 – 13:00

1. Bone Health Programme

‘Proactive approach to Bone Health’

2. Community Admiral Nurse Service

**‘Helping to prevent falls and fractures
in people with Dementia’**

Dedicated to improving healthcare and driving economic growth through innovation

www.ahsn-nenc.org.uk  @AHSN_NENC

Background

Osteoporosis “porous bone”

Bone loss outpaces growth of new bone

The risk of fracture is greatly increased

Occurs silently and progressively

No symptoms until the first fracture

Osteoporotic fracture

Hip, spine and wrist

1 in 3 women and 1 in 5 men

Estimated to occur every 3 seconds

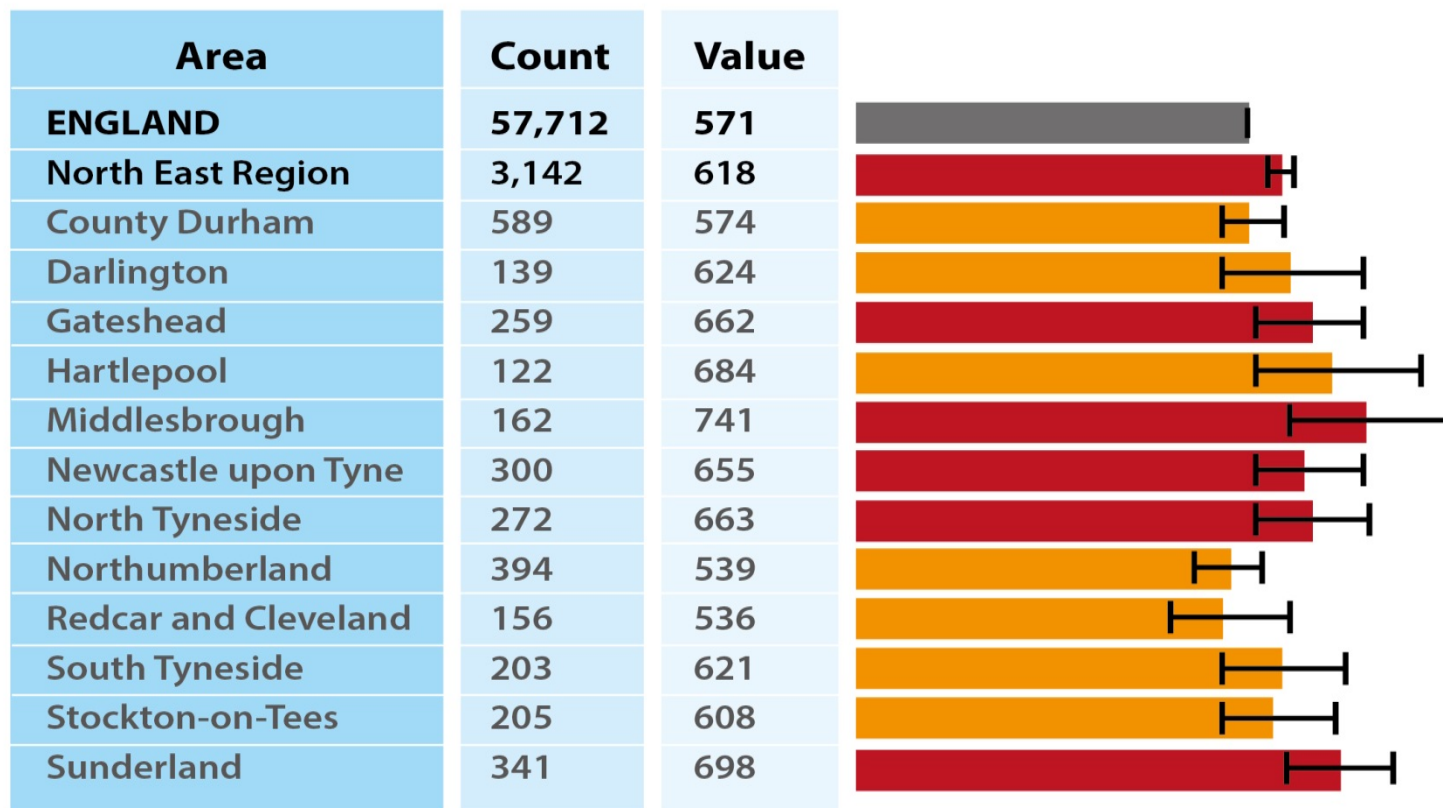

Consequences of Hip Fractures

- **Hip fracture** *(data taken from 2015 National Report of Hip Fracture Database)*
 - Around 65,000 hip fractures occur each year in the UK
 - Account for ~4000 in patient beds DAILY
 - Commonest cause of injury-related death – 30 day mortality rate 8.2%
 - Loss of independence – 46% patients return home within 30 days
 - Loss of mobility - 50% of patients with hip fracture suffer permanent disability (only 30% fully recover)
 - Care costs exceed £2 billion a year (excluding social care costs)

North East Region

4.14i - Hip fractures in people aged 65 and over (Persons) 2014/15

Benefits to Patients

Education on the risk of osteoporosis; and, the importance of a healthy diet, exercise and (if required) bone health therapies/treatments, in reducing fracture risk.

Optimise osteoporosis treatment and support primary and secondary fracture prevention

Benefits for GPs Practices/Surgeries?

- QOF Prevalence and Value (Osteoporosis QOF points)
- the aim of Quality Outcomes Framework is to improve preventative care in Primary Care by ‘encouraging’ identification of patients with a number of hazardous conditions – osteoporosis, AF, COPD, Diabetes

Why do it?

- Strong Bones – Fracture Prevention
- Patient care optimised within clinical therapy area
- Patient Education on the importance of a Healthy Diet and Exercise
- Proactive approach to Bone Health (“Ageing Well”)
- NHS/Social Care savings related to Fracture Prevention

Methods 1

- Using trained Clinical Pharmacists (Interface Clinical Services to interrogate GP electronic patients records.
- Using a screening tool developed with Sheffield University.
- Hence screen all at risks patients or potentially at risk patients GP Practice lists

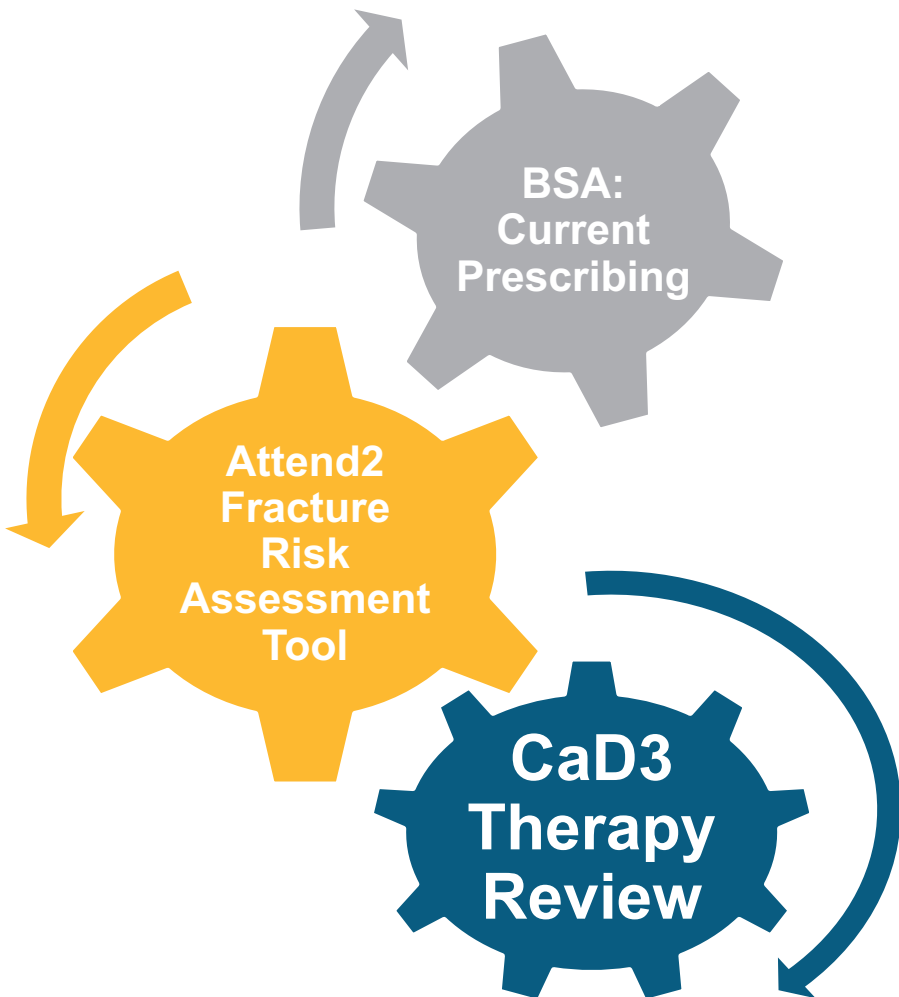

Methods 2

- To produce 3 groups of patients to discuss with each GP Practice
 1. At risk of Osteoporosis
 2. High Osteoporosis risk, +/- Osteoporosis related fractures
 3. List those who have been on Bone Sparing Therapy who may need review

Methods: 3

- To discuss each groups of patients with GP, where appropriate to discuss possible future management of individual (high risk) patients

Interface Clinical Services – Toolbox

1. CaD3 Therapy Review

Identification and review of patients at risk of Calcium & vitamin D3 deficiency - the two most important nutrients for bone health

2. Attend2: Fracture Risk Assessment Tool

Proactive identification of patients at risk of osteoporotic fracture – underpinned by FRAX

3. BSA: Current Prescribing

Review of patients currently receiving bone sparing agents (BSA) to support safe and effective preventative therapy

Impact of the Bone Health Programme at a glance.....

Population
screened
389,662

Case
Reviews
126,027

Interventions

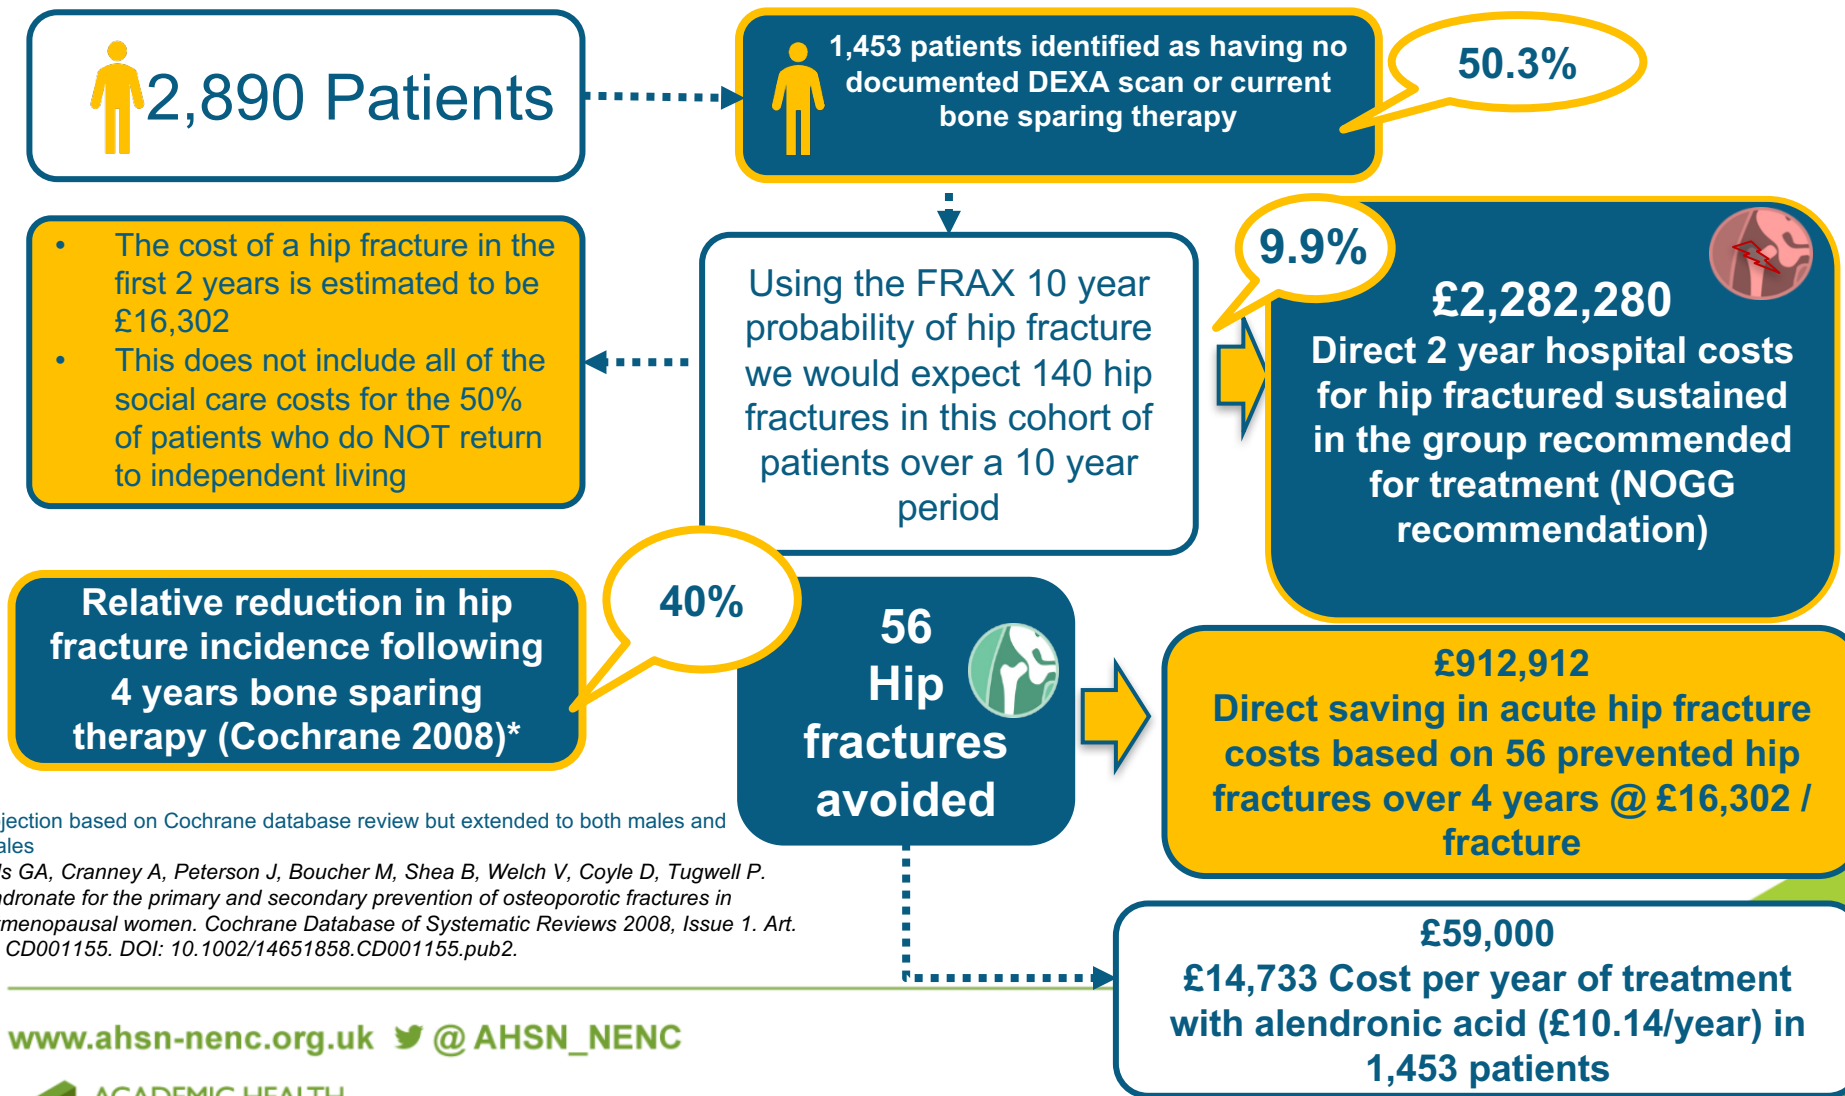

12,684

2890 with high
risk of fracture

Attend2: Fracture – Cost Impact Modelling

If we look at projected hip fractures within the cohort recommended for treatment with a bone sparing therapy (NOGG)

*Projection based on Cochrane database review but extended to both males and females
Wells GA, Cranney A, Peterson J, Boucher M, Shea B, Welch V, Coyle D, Tugwell P. Alendronate for the primary and secondary prevention of osteoporotic fractures in postmenopausal women. Cochrane Database of Systematic Reviews 2008, Issue 1. Art. No.: CD001155. DOI: 10.1002/14651858.CD001155.pub2.

Osteoporosis QOF – what we found (55 practices)

409

The combined number of patients included within the Osteoporosis QOF Registers (Ave 7.5 patients per practice – 55 practices)

The number of patients identified for Osteoporosis QOF register Inclusion (Ave 41 patients per practice)

2249

9

The number of points allocated to the Osteoporosis QOF

The average additional income realised per patient added to the osteoporosis register

£170

Next Step in the ICS Toolbox

Bone Sparing Audit: Current Prescribing

- Review of patients currently receiving BSA to support safe and effective preventative therapy (pilot across West Northumberland)
- To Support the Proactive Review of Current Prescribing and Identification of GAPS in Care

www.ahsn-nenc.org.uk @AHSN_NENC

NEWCASTLE HOSPITALS NHS FT

Nature of fall	% of Admissions
Unspecified fall	62%
Fall on same level from slipping, tripping and stumbling	13%
Other slipping, tripping and stumbling	8%
Fall from Bed	8%
Fall on and from stairs and steps	4%
Fall from Chair	2%
Other Fall	3%
TOTAL	100%

The nature of falls varies which suggests that some, if not all, falls may have been preventable with the implementation of appropriate falls prevention strategies and programmes. Some fractures may have been preventable with appropriate treatment of osteoporosis.

Working in Partnership

www.ahsn-nenc.org.uk  @AHSN_NENC

Newcastle Community Admiral Nurse Service

- ❑ To improve the complex care and support of people with dementia and their families
- ❑ The innovative objective will be to reduce the incidence of falls and fractures in people with dementia. These are particularly common in people with dementia and lead to prolonged hospital stay or transfer from home to care homes and increased premature mortality

Overall aim of this Initiative

- Education on Bone Health through healthy diet and exercise
- Ensuring people with dementia are on the correct therapies to manage their bone health if required
- Spread this new part of the role to other Admiral nurses in the region and more widely
- Spread the admiral nurse service across the Country through Dementia UK and on wider global footprint through AMGEN

Conditions to Become a Reference Site

- Political, organisational, technological & financial readiness.
- Share learning, knowledge & resources for innovation.
- Contribution to European cooperation & transferability.
- Delivering evidence of impact against the triple win approach.
- Scale of demonstration & deployment of innovation.

Political, Organisational, Technological & Financial Readiness

- **Political & Organisational Readiness**
 - The Public Bodies (Joint Working) Scotland Act
 - Quality Strategy
 - 20:20 Vision
- **Technological Readiness**
 - MOMENTUM toolkit embedded in the TEC programme
- **Financial Readiness**
 - Integrated Resource Framework

Share Learning, Knowledge & Resources for Innovation

Scotland has put in place a number of national measures that support service improvement, shared learning & knowledge transfer, including:

- Reshaping Care for Older People Programme
- Improvement Network for Integrated Care & Support
- Managed Clinical Networks
- Improvement Hub
- 4 National Innovation Centres
- Telehealth & Telecare Learning Network

Contribution to European Collaboration

- Members of European networks, including: EHTEL, EUREGHA, ECHA, CORAL and EIP on AHA.
- Lead role in developing the B3 Maturity Model for Integrated Care and now leading EU project, SCIROCCO, to develop a self-assessment tool to facilitate knowledge transfer & scaling up of good practices in Europe.
- Host Study Visits from other EU regions, focused on sharing learning.
- Memorandums of Understanding with Catalonia and the Basque Country to facilitate knowledge transfer and exchange of good practices in integrated care and digital health between the countries.

Delivering Evidence of Impact Against the Triple Win Approach

Scotland has gained a reputation for supporting innovation and prevention approaches linked to economic growth and this can be evidenced through the following national strategic initiatives:

- Health and Wealth in Scotland: A Statement for Intent for Innovation in Health
- Establishment of national Innovation Partnership Board
- Establishment of 4 national Innovation Centres
- Innovation Champions
- Health Innovation Assessment Portal
- “CAN DO Innovation Forum”

Scale of demonstration & deployment of innovation

- Involved in at-scale EU funded projects including SmartCare, United4Health, EU Joint Action on Dementia 2015-2018 and EU Joint Action on Prevention of Frailty.
- Technology Enabled Care Programme – national programme funded by Scottish Government to embed and scale up digital health and care solutions.
- Digital Health and Care Institute – set up to support the development of new innovation solutions and services

Northern Ireland Reference Site – Success Factors

- Connectedness across sectors – health and social care/academia/industry
- Embedded Connected Health ecosystem
- Integrated health and social care – facilitates person-centred ‘joined-up- care and lends itself to the adoption and scaling up of new approaches and interventions
- Scale – population of 1.8m, ideally sized to support trialling and rollout of innovation

NI Reference Site – Areas of Good Practice

- NI Electronic Care Record (NIECR) – enhancing integration and information flow at a regional level
- NI Single Assessment Tool (NISAT) – capturing information required for holistic assessment of the older person. Electronic version – eNISAT – interfaced with NIECR enabling information sharing between acute and community sectors
- Medicines Optimisation – ensuring that people obtain the best possible advantage from their medications. Extensive international engagement and knowledge transfer success including Republic of Ireland, England, Sweden, Norway and Poland.

Northern Ireland Reference Site – Success Factors

Areas of good practice – strong examples of innovation showcasing:

- person-centred approach
- continuous drive to enhance service integration
- maturity/evidence of impact on the ground
- evidence of activity to engage with other regions in coaching/scaling up

HOW WE GOT

Our Strategy

Be clear what we want to achieve:

- Measurable impact on healthcare value
- Scalable to all wales level
- Affordable and adoptable

Be clear what we do:

- **Identify** good stuff
- **Test** it works in Wales
- **Scale** to the whole of Wales

Prioritise limited resources

Our Approach

Pace

- Rapid decision making
- Agreed delivery milestones

Protection

- Specific funding for specific purposes
- Quarterly monitoring

Proportionality

- Simple processes and administration
- High level purposes and targets
- Real world evidence

But flexible.....

Our Reference Site Partners

Application

National

- Choosing Wisely Wales
- Choose Pharmacy
- National Exercise Referral Scheme

Local

- Care Homes Medicines Management
- CARTREF – Telehealth in North Wales

What have we done since?

National

- Establishment of a Digital Ecosystem
- Efficiency through Technology Fund – Extension
- PROM, PREM, Value Based Healthcare

Local

- Small Business Research Initiative – Dementia Challenge
- Citizen Driven Health

Aspirations & Challenges

Always scope to do more.....

- Increase engagement in International Partnerships, Projects & Networks
- Upscale of Successful Projects
 - National TEC Programme (WG & NHS)
 - Tech Exemplars – Cataract Surgery
- Welsh Health Innovation & Technology Accelerator

Llywodraeth Cymru
Welsh Government
